

## Field Operator – Utilities

[Apply Now](#)

Company: QAFCO

Location: Qatar

Category: transportation-and-material-moving

### Description

#### JOB PURPOSE

The role holders will have responsibility for operating and monitoring field equipment, in all field areas of the Utilities plant to assist in achieving effective optimum operational status. They are deployed in the field on a shift basis, and they have an emergency response role and must ensure that all activities are carried out in compliance with QAFCO Integrated Management Systems procedures. They have authority to make field related emergency decisions as per equipment operating procedure and handling of emergencies, and in normal plant situations, in consultation with Panel operator and Shift Supervisor.

#### KEY ACCOUNTABILITIES

Operate field equipment in accordance with operating procedures and approved safety and environment procedures to ensure effective and optimum operational status of equipment.

Make decisions to stop/start equipment based on experience and abnormal situations.

Monitor and log all operating parameters to ensure operations are within normal limits that all irregularities are reported to panel operator for advice and/or Shift Supervisor for solution.

Develop an understanding of all operational procedures and practices through on-the-job training to ensure readiness and capability to effectively operation of all field areas of the plant.

Provide immediate first-line response capability in the event of emergencies or major

incidents in order to eliminate or limit potential loss or damage to QAFCO personnel, assets and the environment. Make appropriate decisions considering the situation.

Perform and provide the necessary assistant on-the-job training of new and trainee operators to ensure they develop the necessary skills to independently operate the allocated areas of the plant.

Perform and adhere to housekeeping procedure to maintain a safe, clean and neat work environment.
