

Infrastructure Drafter/CAD Operator #3942

[Apply Now](#)

Company: GovCIO

Location: Qatar

Category: other-general

Overview

GovCIO is currently hiring for an Infrastructure Drafter/CAD Operator. This position will be located in AUAB, Qatar and will be an onsite position.

Responsibilities

The contractor shall:

Operate and maintain I/O cable plant software;

Create, provide and update CAD drawings of C4 telecommunications, IT infrastructure and system;

Provide CAD drawings that reflect engineered solutions and contain sufficient detail to serve as installation drawings;

Upon completion of installations, convert mark-up drawings to final, as-built drawings;

Incorporate drawings into facility records;

Complete drawings in AutoCAD, Google Earth (SIPRNET) or Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance infrastructure planning system visual component to USAF and Army standards;

Provide geographic and geospatial information capability;

Update base geographic and geospatial information system (e.g., ArcGIS) to provide the communications overlay for base planning;

Ensure updates include physical aspects of the infrastructure (e.g., location, type, number of pairs/strands); however, no circuit data shall be documented.

Qualifications

Associate's with 5 - 8 years (or commensurate experience)

Clearance Required: Secret

Required Skills and Experience:

Associates Degree in drafting or illustration from an accredited university

AutoCAD Level 1

AutoCAD Level 2

Intermediate experience in: preparing Level 3 engineering drawings, circuit schematics, and illustrations, using AutoCAD or Micro Station for electronics systems or equipment; preparing detailed CAD drawings of telecommunications, IT infrastructure, and systems to reflect engineering solutions and to facilitate installation of the telecommunications and IT infrastructure; preparing final as-built drawings that become part of the facility records in AutoCAD, to USAF or US Army standards; performing visual inspections and conducting precise measurements to verify engineering drawings for electronic systems or equipment
