

## Water Consultant: Hydraulic Modeller- Clean Water Networks

[Apply Now](#)

Company: Idrica

Location: Doha

Category: other-general

Do you want to develop as a professional in a company where you will have autonomy and see the impact of your work alongside a team that will help you in everything you need

### **This position will interest you!**

At Idrica we aim to create a better world by helping to make the management of water, our most precious asset, as efficient as possible.

We assure you that you will learn something new every day, you will face different challenges and we will provide you with the necessary tools and technologies to develop and grow within the company.

### Why work at IDRICA

Professional development and autonomy to do your job: You will have the opportunity to grow in the company, stability and work for a long time. There is a lot of trust and, within general guidelines, you will be able to decide your objectives and organise yourself as you see fit to achieve them.

Committed team that will help you with whatever you need: You will see that there is a lot of camaraderie and you will never feel alone in the face of danger. We are a

team and everyone will be willing and available to answer your questions or give you a hand.

Hybrid environment where you can organise your schedule the way you want: You'll have the flexibility to organise your day-to-day life, thus reconciling your work and personal life. You'll work in a hybrid environment because we love going to the office too: we share breakfast, connect and solve more things. You don't just work, you team up.

Every day you'll learn something new and face different challenges: We are growing very fast and we have to adapt and provide solutions to new situations as they arise, which will help you grow both personally and professionally.

Booming sector where you will see the impact of your work on day-to-day life: Water is going to be an increasingly scarce commodity and we help to make its management as efficient as possible, contributing your grain of sand to the improvement of the environment.

In addition to these benefits, you can enjoy many others:

such as teambuilding events, training platforms, 50% subsidised catering or the iFeel platform, among others, with the aim of making your day-to-day life at Idrica much better.

### **What will be your mission as Water Consultant**

The main mission of the position is to lead and collaborate as a specialist in projects related to the integral water cycle with a special focus on the modelling of water supply networks.

You will work on the development and implementation of intelligent control solutions for the water sector, collaborating with a multidisciplinary team composed of IT experts, programmers, data scientists, engineers and business professionals.

On a day-to-day basis, you will coordinate a team of hydraulic modellers to meet defined deliverables. We are looking for someone who wants to grow within the company, getting involved in software design, supporting business development activities and implementing

full-scale solutions.

What will make you successful in this position

3+ years of experience in supply network modelling.

Bachelor's degree, Diploma, Bachelor's degree

Full knowledge of the operation of a water supply network, as well as the modelling of drinking water networks.

Languages: Spanish and a high level of English is essential.

The position may require travel

Desirable knowledge:

Hydraulic modelling software for drinking water networks (EPANET or other).

Water quality modelling software for water supply networks

Geographic Information Systems (GIS)

Knowledge of water supply network modelling tools including water quality modelling

Good knowledge of control strategies applied in the water sector.

Knowledge of programming and data management modelling

Experience in international project management

So, if you want to make an impact on the world, do it with a team that will help you with whatever you need and in a company where the opportunities for growth are real,

**Idrica is the place for you!**
